

Course Outline (Higher Education)

Institute / School:	Global Professional School
Course Title:	ENGINEERING DESIGN AND DRAFTING
Course ID:	GPENG1004
Credit Points:	15.00
Prerequisite(s):	Nil
Co-requisite(s):	Nil
Exclusion(s):	Nil
ASCED:	039999

Description of the Course:

This course introduces students to the principles of engineering design and drafting. It utilises commonly used engineering software such as the AutoDESK software AutoCAD introducing the fundamentals of communicating a design through a technical drawing as well as how to implement this within the computer software. Through practise and example, students will develop their skills to a level capable of modelling complicated objects or structures in two (2D) and three dimensions (3D) as well as developing the skills to determine key information from their models. By the end of the course, students should be able to communicate intricate ideas with succinct diagrams to a deadline.

Grade Scheme: Graded (HD, D, C, P, MF, F, XF)

Work Experience:

No work experience: Student is not undertaking work experience in industry.

Placement Component: No

Supplementary Assessment: Yes

Where supplementary assessment is available a student must have failed overall in the course but gained a final mark of 45 per cent or above and submitted all major assessment tasks.

Program Level:

Level of course in Program	AQF Level of Program					
	5	6	7	8	9	10
Introductory	✓					

Level of course in Program	AQF Level of Program					
	5	6	7	8	9	10
Intermediate	■	■	■	■	■	■
Advanced	■	■	■	■	■	■

Learning Outcomes:

On successful completion of the course the students are expected to be able to:

Knowledge:

- K1.** Reproduce, reorganise and review engineering drawings.
- K2.** Identify the correct usage of isometric, third angle, oblique and sectional drawing styles.
- K3.** Outline relevant engineering drawing standards.

Skills:

- S1.** Translate between different views of an object and develop two and three dimensional models.
- S2.** Appraise the capabilities of engineering design software.
- S3.** Use engineering drawings as communication tools.
- S4.** Develop the appropriate English language and academic skills to successfully study at an undergraduate level.

Application of knowledge and skills:

- A1.** Apply knowledge of drafting principles to produce high quality drawings.
- A2.** Produce an estimate of quantities from two and three-dimensional models.

Course Content:

Topics may include:

- Basic techniques in technical drawing, incorporating third angle, isometric, sectioning, assembly drawings, dimensioning and tolerancing.
- Introduction to using computer software to undertake two and three dimensional modelling.
- Introduction to the methodology of engineering design incorporating a practical design task.
- Elective assignments focusing on mechanical, mining, civil, mechatronic or other relevant areas

Values:

- V1.** Appreciate the role of engineering drawing in the representation of engineering systems, mechanisms and structures.

Graduate Attributes

The Federation University Federation graduate attributes (GA) are entrenched in the [Higher Education Graduate](#)

[Attributes Policy](#) (LT1228). FedUni graduates develop these graduate attributes through their engagement in explicit learning and teaching and assessment tasks that are embedded in all FedUni programs. Graduate attribute attainment typically follows an incremental development process mapped through program progression. **One or more graduate attributes must be evident in the specified learning outcomes and assessment for each FedUni course, and all attributes must be directly assessed in each program**

Graduate attribute and descriptor		Development and acquisition of GAs in the course	
		Learning Outcomes (KSA)	Assessment task (AT#)
GA 1 Thinkers	Our graduates are curious, reflective and critical. Able to analyse the world in a way that generates valued insights, they are change makers seeking and creating new solutions.	K1-K3	1, 2
GA 2 Innovators	Our graduates have ideas and are able to realise their dreams. They think and act creatively to achieve and inspire positive change.	Not applicable	Not applicable
GA 3 Citizens	Our graduates engage in socially and culturally appropriate ways to advance individual, community and global well-being. They are socially and environmentally aware, acting ethically, equitably and compassionately.	Not applicable	Not applicable
GA 4 Communicators	Our graduates create, exchange, impart and convey information, ideas, and concepts effectively. They are respectful, inclusive and empathetic towards their audience, and express thoughts, feelings and information in ways that help others to understand.	S3-4	1, 2
GA 5 Leaders	Our graduates display and promote positive behaviours, and aspire to make a difference. They act with integrity, are receptive to alternatives and foster sustainable and resilient practices.	Not applicable	Not applicable

Learning Task and Assessment:

Learning Outcomes Assessed	Assessment Tasks	Assessment Type	Weighting
K1 - K3, S1 - S4, A1 - A2	Technical drawing assessments focusing upon a relevant engineering area.	Report	40 - 60%
K1 - K3, S1 - S4, A1 - A2	Elective assignments focusing upon a relevant engineering topic.	Report/Presentation	40 - 60%
