Description of the Course :

In our media-dominated world, we are constantly reading, viewing and interpreting the world through the lens of print, literary, digital and screen media. These media provide the images, stories and soundtrack to our lives. We read or view for many reasons, including entertainment, information and social participation. Reading and viewing can also have a considerable influence in shaping our view of the world, and our responses to texts can be critical, aesthetic or affective. This course functions as an introductory course for the disciplines of literature, creative writing and media and screen studies. It introduces students to ways of reading and viewing literary, media and screen texts critically and with the skills to understand how their meanings are produced. Students will learn basic concepts of analysis applicable to literary, screen and digital media, as well as an understanding of the role of readers and viewers in constructing textual meaning. The course will examine ways of reading literary texts, still and moving images, and digital texts, including narrative structures, narration, time, plot, point of view, metaphor and allegory, reception, audiences and fandom.

Grade Scheme: Graded (HD, D, C, etc.)

Supplementary Assessment: Yes

Where supplementary assessment is available a student must have failed overall in the course but gained a final mark of 45 per cent or above and submitted all major assessment tasks.

Graduate Attributes

The Federation University FedUni graduate attributes (GA) are entrenched in the Higher Education Graduate Attributes Policy (LT1228). FedUni graduates develop these graduate attributes through their engagement in explicit learning and teaching and assessment tasks that are embedded in all FedUni programs. Graduate attribute attainment typically follows an incremental development process mapped through program progression. **One or more graduate attributes must be evident in the specified learning outcomes and assessment for each FedUni course, and all attributes must be directly assessed in each program**
