## Description of the Course:

How we respond to ethical issues defines who we are as individuals and practitioners. It also determines the kinds of institutions and organisations in which we participate, and the kind of society in which we want to live. It is paramount that we understand the complexity of these issues if we are to engage the world responsibly. This course, through an interrogation of values (personal/professional/social/political), explores how we engage the world as ethically responsible citizens and professional practitioners. The course will begin with an introduction to major ethical theories, including utilitarianism, deontology, and virtue ethics. We will then interrogate the role of values, principles, emotion, and reasoning in responding to some of the pressing practice issues and ethical questions of our day. In particular, we will focus on how we understand and justify our relations with other human beings, contemporary technologies, non-human animals, the environment, institutions, and organisations. The course will draw upon real-world scenarios that engage students in complex cases of ethical decision-making.

**Grade Scheme:** Graded (HD, D, C, P, MF, F, XF)

**Supplementary Assessment:** Yes

Where supplementary assessment is available a student must have failed overall in the course but gained a final mark of 45 per cent or above and submitted all major assessment tasks.

### Learning Outcomes:

#### Knowledge:

- K1.** Analyse ethical principles and theories and grasp their implications for contemporary ethical issues and professional practice.
- K2.** Interrogate how values (personal/professional/political/social) inform the way we address ethical obligations in a diversity of contexts, including everyday contexts and/or micro practice, institutional and organisational contexts.
- K3.** Explain the requirements of ethical reasoning and decision-making.
- K4.** Demonstrate awareness of the competing perspectives and norms at work in debates concerning ethical conduct, contemporary ethical issues, and frameworks for professional ethical practice.

#### Skills:

- S1.** Effectively apply the skills involved in ethical reasoning and argument in everyday contexts, including professional contexts.
- S2.** Examine and evaluate ethical arguments and conclusions through independent research.
- S3.** Demonstrate proficiency in expression and defence of ethical positions and arguments in both oral and written forms.

#### Application of knowledge and skills:

- A1.** Recognise and reflect on different accounts of ethical norms, decisions, and actions.
- A2.** Articulate and justify ethical positions in verbal and written form, demonstrating proficiency with the conventions and techniques of ethical argument and decision-making.

#### Course Content:

This course will engage students in interrogating and applying ethical theories and ethical practice frameworks including:

- Utilitarianism
- Deontology
- Virtue ethics

Students will apply these theories to a range of ethical questions, potentially including the following:

- What ethical obligations do we have towards organisational/professional codes of ethics?
- What are our ethical obligations to assist the vulnerable, including women, children, young people and people with disabilities?
- What are our ethical responsibilities to peoples in other countries and regions of the globe?
- What kinds of ethical considerations do we owe to people marginalised by age, class, race, gender, and/or sexuality, including people from lower socio-economic backgrounds and people of colour?
- What are the ethics of sex and consent?
- Is it justifiable to restrict certain forms of speech, such as hate speech or violent pornography?
- What are our ethical obligations in light of new technology, such as biotech, surveillance, and social media?

- How should we treat non-human animals?
- What kinds of ethical obligations do we have to the environment and ecological systems, especially in light of climate change?

The course will approach these questions from the perspective of analysing values (personal/professional/social/political) that define how we act as ethically responsible citizens and ethical professional practice.

## FEDTASKS

Federation University Federation recognises that students require key transferable employability skills to prepare them for their future workplace and society. FEDTASKS (**T**ransferable **A**tttributes **S**kills and **K**nowledge) provide a targeted focus on five key transferable Attributes, Skills, and Knowledge that are embedded within curriculum, developed gradually towards successful measures and interlinked with cross-discipline and Co-operative Learning opportunities. *One or more FEDTASK, transferable Attributes, Skills or Knowledge must be evident in the specified learning outcomes and assessment for each FedUni course, and all must be directly assessed in each program.*
