**Description of the Course:**

This course focuses on the complex relationships between crime and violence. The course tasks students to analyse the stereotypes and understandings of crime in Australia, especially as they relate to regional and rural settings. Students will challenge the assumption that crime in the modern world is primarily an urban phenomenon. The impact of crime on local communities, both acquisitional and interpersonal, will be examined. The course will explore the complexity of contemporary crime and the responses that it generates from local communities and the formal criminal justice system. The role of law and order campaigns to manage changes in crime and violence patterns will be examined. Regional and rural crime prevention programs will be assessed, situated in the growing academic field of rural criminology. The course will consider the role of remoteness (geographical, social and political) in cycles of violence and the responses of the criminal justice institutions.
