

Unit Outline (Higher Education)

Institute / School:	Institute of Health and Wellbeing
Unit Title:	ACQUIRED LANGUAGE AND SPEECH IMPAIRMENT 1
Unit ID:	HEASP1015
Credit Points:	15.00
Prerequisite(s):	Nil
Co-requisite(s):	Nil
Exclusion(s):	(HEASP5015)
ASCED:	061707

Description of the Unit:

This unit introduces acquired communication disorders that are associated with the various types of dementia, stroke and traumatic brain injury. Topics may include: aphasia, cognitive-communication impairments, acquired reading and spelling disorders; motor speech disorders, degenerative neurological conditions and bilingual aphasia. The unit will provide students with an understanding of the theoretical constructs and clinical features of acquired communication impairments of adults. This unit will assist student to identify and understand appropriate language and communication assessments and interventions for adults with acquired communication disorders. The unit will also help student identify the impacts on an individual with an acquired communication disorder

Grade Scheme: Graded (HD, D, C, P, MF, F, XF)

Work Experience:

Not wholly work experience: Student is not undertaking work experience in industry or student is undertaking work experience in industry where learning and performance is directed by the provider.

Placement Component: No

Supplementary Assessment: Yes

Where supplementary assessment is available a student must have failed overall in the Unit but gained a final mark of 45 per cent or above, has completed all major assessment tasks (including all sub-components where a task has multiple parts) as specified in the Unit Description and is not eligible for any other form of supplementary assessment

Course Level:

Level of Unit in Course	AQF Level of Course					
	5	6	7	8	9	10
Introductory	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Intermediate	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Advanced	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Learning Outcomes:

Knowledge:

- K1.** Hypothesise how different strokes (location, cause) will affect the language and non-language functions of an individual (drawing on your knowledge of neuroanatomy/ neurophysiology)
- K2.** Provide detailed perceptual, acoustic, kinematic and physiologic descriptions of the communication characteristics of acquired communication disorders
- K3.** Evaluate formal and informal assessment protocols for adults with acquired language and cognitivecommunication disorders

Skills:

- S1.** Discuss the impact of the cognitive communication disorders associated with dementia, stroke and traumatic brain injury on the activity, participation and quality of life of a person and their family

Application of knowledge and skills:

- A1.** Demonstrate analyse and interpret distinctive features of acquired communication disorders for differential diagnosis
- A2.** Demonstrate how a speech pathologist may alter their own communication style when interacting with someone with an acquired communication disorder

Unit Content:

Professional Standards for Speech Pathologist in Australia (2020), Speech Pathology Guidelines for Reporting of Aboriginal and Torres Strait Islander Curriculum Development and Inclusions (2018), National Quality and Safeguarding Framework (NQS, 2018), National Safety and Quality Health Service (NSQHS) Standards (2017-2019) and National Aged Care Quality Standards (2019) have substantially informed the syllabus/content of this unit.

Topics may include:

- Characteristics of specific acquired communication disorders
 - Dementia
 - Stroke
 - Traumatic brain injury
- Formal and informal assessment protocols
 - Aphasia
 - Dysarthria
 - Cognitive-communication impairments
 - Acquired reading and spelling disorders
 - degenerative neurological conditions
 - The appraisal and diagnosis of the residual communicative abilities
- Impact of acquired communication disorders
 - on an individual's function, participation and quality of life
 - on caregivers
 - on communication partners

- Role of the National Disability Insurance Scheme (NDIS)

Learning Task and Assessment:

Professional Standards for Speech Pathologist in Australia (2020).

Students must complete all assessment tasks and achieve a minimum overall grade of 50% to pass this unit.

Learning Outcomes Assessed	Assessment Tasks	Assessment Type	Weighting
1. K1, K2, K3	Students demonstrate acquisition of knowledge of key theoretical concepts	Multiple choice question task/s	10-20%
2. K2, K3, S1, A1	Case study / Analysis	Case Study Written task	20-40%
4. K1, K2, K3, S1, A1, A2	Examination of unit content	Written Examination	40-60%

Adopted Reference Style:
