Course Outline (Higher Education)

School / Faculty: Faculty of Health

Course Title: NURSING PRACTICE 4: ADVANCED PATHOPHYSIOLOGY & PHARMACOLOGY APPLIED TO NURSIN

Course ID: NURBN2016

Credit Points: 15.00

Prerequisite(s): Nil

Co-requisite(s): (NURBN2015)

Exclusion(s): Nil

ASCED Code: 060301

Grading Scheme: Graded (HD, D, C, etc.)

Program Level:

AQF Level of Program						
	5	**6**	**7**	**8**	**9**	**10**
Level						
Introductory						
Intermediate			✔			
Advanced						

Learning Outcomes:

On successful completion of this course the students are expected to be able to:

Knowledge:

- **K1.** Critically examine and explain the pathologic effects of selected disease processes at the cellular and systemic levels for the endocrine; hepatic/immune; renal; reproductive systems; and the special senses;
- **K2.** Identify and assess appropriate/inappropriate responses to therapy;
- **K3.** Identify the roles of the professional nurse in relation to medication administration and education;
- **K4.** Analyse and describe characteristics of major groups and selected individual medications in terms of the following: mechanism(s) of action; drug effects; therapeutic uses; side effects and adverse effects; toxicity and management of overdoses; interactions; and nursing responsibilities related to administration, monitoring, and teaching;

Skills:

- **S1.** Use the clinical reasoning cycle to understand the connection between pathophysiological and pharmacological principles as a basis for nursing practice;
- **S2.** Critically evaluate for the presence and effects of compensatory mechanisms in response to major physiological alterations;

Application of knowledge and skills:

- **A1.** Interpret diagnostic tests in relation to objective and subjective symptomatology;
- **A2.** Apply pathophysiological concepts of disease to the management of commonly occurring conditions across the life span; and
- **A3.** Apply pharmacological concepts of treatment of commonly occurring conditions across the life span.

Course Content:

NMBA – Registered Nurses Standards for Practice (2016); NMBA Code of Professional Conduct for Nurses (2013) and NMBA Code of Ethics for Nurses (2013) have been considered in the development of the content of this course. Utilising Inquiry Based Learning (IBL) this course will incorporate a Lifespan Approach to course materials and specific case based examples to address Australian Commission on Safety and Quality in Health Care, Clinical Care Standards (2015).

Topics may include:

- Pathophysiology of the National Health Priority Areas for diseases of the endocrine; hepatic/immune; renal; reproductive systems; and the special senses throughout the lifespan
- Medication nomenclature and classification of common classes of medications used to treat specific endocrine; hepatic/immune; renal; reproductive systems; and the special senses throughout the lifespan
- Pharmacokinetics and Pharmacodynamics of common classes of medications used to treat specific endocrine; hepatic/immune; renal; reproductive systems; and the special senses throughout the lifespan
- Drug actions and changes in drug actions in disease process of the endocrine; hepatic/immune; renal; reproductive systems; and the special senses
- Common adverse actions of pharmacological treatments of endocrine; hepatic/immune; renal; reproductive systems; and the special senses
- Drug administration principles – safe drug calculation practices
- Interpretation of diagnostic tests in relation to endocrine; hepatic/immune; renal; reproductive systems; and the special senses.

Values and Graduate Attributes:

FedUni graduate attributes statement. To have graduates with knowledge, skills and competence that enable them to stand out as critical, creative and enquiring learners who are capable, flexible and work ready, and responsible, ethical and engaged citizens. These have been applied to nursing context below;

Course Outline (Higher Education)

NURBN2016 NURSING PRACTICE 4: ADVANCED PATHOPHYSIOLOGY & PHARMACOLOGY APPLIED TO NURSING

Nursing Graduate Attributes:

The Bachelor of Nursing is a graduate capabilities outcomes-based curriculum. This course develops and/or assesses the following Federation University Australia and Registered Nursing Graduate Capabilities and the NMBA Registered Nurse Standards for Practice (2016).

Federation University Graduate Attributes	**Registered Nurse Graduate Capabilities**	***Introductory (Introduced)***	***Intermediate (Repeated)***	***Advanced (Taught)***	***Assessed***
Responsible, ethical, engaged Social/cultural perspectives Local/national/international communities	1. Professional and ethical decision maker		✔		✔
	2. Politically astute, situational leader and citizen		✔		
	3. Socially and culturally aware agent for change		✔		✔
Critical, creative and enquiring Problem solver Ongoing learning	4. Critical, reflective thinker adept in clinical reasoning		✔		
	5. Creative problem solver		✔		✔
	6. Life-long researcher	✔			
Capable, flexible and work ready Communication skills Independent & collaborative worker	7. Skilled therapeutic Communicator			✔	✔
	8. Capable Inter-Disciplinary Healthcare Team Member		✔		
	9. Competent, caring, safe and professional practitioner			✔	✔

Values:

V1. Understand the connection between evidence, nursing practice and outcomes of nursing care for National Health Priority areas of endocrine; hepatic/immune; renal; reproductive systems; and the special senses.

V2. Appreciate the importance of the role of the nurse in maintaining safe medication practice when delivering patient care.

Learning Task and Assessment:

A 15 credit point course will involve a minimum of 150 hours of learning. For every one hour of teacher directed learning there will be a minimum of two hours of student/learner directed learning. The *Teacherdirected* hours of student learning in this course will be experienced primarily through teaching innovations like interactive technology enhanced learning, class discussions, audio-visual presentations, flexible blended and on-line learning, low and high fidelity simulations, exploration of case studies and placement and laboratory sessions in compulsory.
Learner-directed hours will include focused learning activities, simulated laboratory learning, practice and reflection on practice, and role modelling. Students are expected to access electronic research databases and use computers to facilitate learning.

Course Outline (Higher Education)

NURBN2016 NURSING PRACTICE 4: ADVANCED PATHOPHYSIOLOGY & PHARMACOLOGY APPLIED TO NURSING

Learning Outcomes Assessed	Assessment Task	Assessment Type	Weighting
K1, K2, K3, K4 S1, S2, A1, A2, A3	Application of prinicples of pathophysiology for nursing practice	Written Test	40 - 60%
K1, K2, K3, K4 S1, S2, A1, A2, A3	Application of pathophysiology for nursing practice	Case Scenario	40 - 60%
K1, K2, K3, K4 S1, S2, A1, A2, A3	Medication Competency Assessment	Medication Calculation Test	HURDLE

Adopted Reference Style:

APA
