

Unit Outline (Higher Education)

Institute / School: Institute of Innovation, Science & Sustainability

Unit Title: SOFTWARE ENGINEERING METHODOLOGIES

Unit ID: ITECH7410

Credit Points: 15.00

Prerequisite(s): (ITECH1400 or ITECH5104)

Co-requisite(s): Nil

Exclusion(s): Nil

ASCED: 020305

Description of the Unit:

This unit focuses on software engineering methodologies that are appropriate for large and/or complex software systems. Topics may include the evolution of software engineering methodologies, configuration management, Software Quality Assurance Plans (SQAPs), communication plans, work product reviews, the importance of testing and quality software, fault tolerance of software systems and future trends and developments.

Grade Scheme: Graded (HD, D, C, P, MF, F, XF)

Work Experience:

No work experience: Student is not undertaking work experience in industry.

Placement Component: No

Supplementary Assessment: Yes

Where supplementary assessment is available a student must have failed overall in the Unit but gained a final mark of 45 per cent or above, has completed all major assessment tasks (including all sub-components where a task has multiple parts) as specified in the Unit Description and is not eligible for any other form of supplementary assessment

Course Level:

Lovel of Unit in Course	AQF Level of Course					
Level of Unit in Course	5	6	7	8	9	10
Introductory						
Intermediate						
Advanced					V	

Learning Outcomes:

Knowledge:

- **K1.** Critique and evaluate the latest directions in software engineering methodologies.
- **K2.** Analyse and apply complex decision making to determine the appropriate methodology to apply to different development situations.
- **K3.** Explain the principles commonly used software engineering methodologies.

Skills:

- **S1.** Critically analyse and use complex decision making to research and determine the appropriate Software Engineering tools and methodologies to utilize in a given situation.
- **S2.** Apply professional communication skills to collaboratively support and manage the engineering of a large software system.
- **S3.** Review, critically analyse and develop artefacts to define processes for quality assurance, risk management and communication in large software development projects.
- **S4.** Implement quality assurance processes and activities in order to verify user requirements and validate design decisions.

Application of knowledge and skills:

- **A1.** Analyse a large system development problem to decide upon the best methodological approach.
- **A2.** Develop appropriate artefacts to support and manage the software engineering process, such as change control and configuration management.

Unit Content:

Topics may include:

- Evolution of software engineering.
- Configuration management change control.
- Software Quality Assurance Plans (SQAPs).
- Communication plans.
- Verification and validation in systems development.
- Understanding and prioritizing user requirements.
- Work product reviews.
- Importance of testing and quality software.

- Fault tolerance of software systems.
- Future trends and developments.

FEDTASKS

Federation University Federation recognises that students require key transferable employability skills to prepare them for their future workplace and society. FEDTASKS (**T**ransferable **A**ttributes **S**kills and **K**nowledge) provide a targeted focus on five key transferable Attributes, Skills, and Knowledge that are be embedded within curriculum, developed gradually towards successful measures and interlinked with cross-discipline and Cooperative Learning opportunities. *One or more FEDTASK, transferable Attributes, Skills or Knowledge must be evident in the specified learning outcomes and assessment for each FedUni Unit, and all must be directly assessed in each Course.*

FEDTASK attribute and descriptor		Development and acquisition of FEDTASKS in the Unit	
		Learning Outcomes (KSA)	Assessment task (AT#)
FEDTASK 1 Interpersonal	Students will demonstrate an advanced ability in a range of contexts to effectively communicate, interact and work with others both individually and in groups. Students will be required to display high level skills in-person and/or online in: • Using and demonstrating a high level of verbal and nonverbal communication • Demonstrating a mastery of listening for meaning and influencing via active listening • Demonstrating and showing empathy for others • High order skills in negotiating and conflict resolution skills • Demonstrating mastery of working respectfully in crosscultural and diverse teams	S2	AT1
FEDTASK 2 Leadership	Students will demonstrate a mastery in professional skills and behaviours in leading others. Students will be required to display skills in: • Creating and sustaining a collegial environment • Demonstrating a high level of self -awareness and the ability to self-reflect and justify decisions • Inspiring and initiating opportunities to lead others • Making informed professional decisions • Demonstrating initiative in new professional situations	Not applicable	Not applicable
FEDTASK 3 Critical Thinking and Creativity	Students at this level will demonstrate high level skills in working in complexity and ambiguity using the imagination to create new ideas. Students will be required to display skills in: • Reflecting critically to generate and consider complex ideas and concepts at an abstract level • Analysing complex and abstract ideas, concepts and information • Communicate alternative perspectives to justify complex ideas • Demonstrating a mastery of challenging conventional thinking to clarify complex concepts • Forming creative solutions in problem solving to new situations for further learning	S1, S3	AT1

FEDTASK attribute and descriptor		Development and acquisition of FEDTASKS in the Unit		
		Learning Outcomes (KSA)	Assessment task (AT#)	
FEDTASK 4 Digital Literacy	Students at this level will demonstrate the ability to work competently across a wide range of tools, platforms and applications to achieve a range of tasks. Students will be required to display skills in: • Mastering, exploring, evaluating, managing, curating, organising and sharing digital information professionally • Collating, managing complex data, accessing and using digital data securely • Receiving and responding professionally to messages in a range of professional digital media • Contributing competently and professionally to digital teams and working groups • Participating at a high level in digital learning opportunities	Not applicable	Not applicable	
FEDTASK 5 sustainable and Ethical Mindset	Students at this level will demonstrate a mastery of considering and assessing the consequences and impact of ideas and actions in enacting professional ethical and sustainable decisions. Students will be required to display skills in: • Demonstrating informed judgment making that considers the impact of devising complex solutions in ambiguous global economic environmental and societal contexts • Professionally committing to the promulgation of social responsibility • Demonstrating the ability to evaluate ethical, socially responsible and/or sustainable challenges and generating and articulating responses • Communicating lifelong, life-wide and life-deep learning to be open to diverse professional others • Generating, leading and implementing required actions to foster sustainability in their professional and personal life.	Not applicable	Not applicable	

Learning Task and Assessment:

Learning Outcomes Assessed	Assessment Tasks	Assessment Type	Weighting
S1, S2, S3, S4, A1, A2	Develop skills in the analysis and practical application of content introduced.	Team and Individual Assignment(s)	70% - 80%
K1, K2, K3, S2, A1	Participate in lectures and laboratories/tutorials, read and summarise theoretical and practical aspects of the unit.	Written or Oral Test, Seminar, or Presentation	20% - 30%
