Course Outline (Higher Education)

School: School of Arts
Course Title: RESEARCH DESIGN, MANAGEMENT AND METHODS
Course ID: BAHRS4034
Credit Points: 15.00
Prerequisite(s): Nil
Co-requisite(s): Nil
Exclusion(s): (BAHRS4031)
ASCED: 090399

Description of the Course:
The purpose of this course is to provide the student with a foundation for undertaking and completing a research project within their chosen disciplines. Students will learn about a range of research practices used in scholarly research and will refine their understanding of disciplinary research practices to develop their skills in recognising how the design of a research project affects the nature and scope of what is then learned from that research. Graduates will be prepared for advanced professional practice and/or for further research in a higher degree program. The course consists of a core, interdisciplinary module examining research design, management and methods, as well as a discipline specific methodology and design component.

Grade Scheme: Graded (HD, D, C, P, MF, F, XF)

Learning Outcomes:

Knowledge:

K1. Analyse principles of scholarly research inquiry, including generic, interdisciplinary and discipline-specific knowledge, understanding and application of research skills
K2. Recognize analytical techniques relevant to one's discipline and how these can be applied for research purposes

K3. Evaluate the quality of research and academic writing at Honours level

Skills:

S1. Practice advanced skills in library, web-based, and domain-specific research
S2. Analyse and interpret domain-specific data
S3. Exhibit ethical and responsible behaviour in conducting discipline-specific research within institutional settings
S4. Compose and develop a research logic, method or plan as relevant to the discipline.

Application of knowledge and skills:

A1. Formulate and communicate one's own, and others, research ideas effectively in written reports and presentations
A2. Apply an understanding of research design, methods, and management techniques directly to one's thesis project.
A3. Identify and evaluate evidence appropriate for supporting one's position
A4. Relate argument in public speaking

Course Content:

Topics may include:

- Theories of knowledge (epistemologies, hermeneutics, global knowledges)
- Theories of research and their application (which may include phenomenological, ethnographic, qualitative, exploratory, quantitative, feminist, de-colonising, indigenous, philosophical)
- The application of contemporary socio/political, literary, and cultural theory to critically analyse research models, practices, texts, literature and creative practice
- Existing research methodologies
- Stages of the research process

Values:

V1. Determine and apply appropriate research methods, data collection and analysis techniques
V2. Produce sound research proposals that will generate useful outcomes
V3. Critically examine current research in at least one major field within their discipline
V4. Effectively locate and access relevant literature on the selected field of study
V5. Synthesise information from a variety of sources and present this in academic writing
V6. Identify and address ethical issues in research

Graduate Attributes

The Federation University FedUni graduate attributes (GA) are entrenched in the Higher Education Graduate Attributes Policy (LT1228). FedUni graduates develop these graduate attributes through their engagement in explicit learning and teaching and assessment tasks that are embedded in all FedUni programs. Graduate attribute attainment typically follows an incremental development process mapped through program progression. One or more graduate attributes must be evident in the specified learning outcomes and assessment for each FedUni course, and all attributes must be directly assessed in each program.
