Description of the Course:
This course examines the way children’s literature has developed over time and across a variety of genres. Focusing primarily on the Western tradition, students will engage with a range of examples which may include picture books, animal stories, fairy tales, fantasy, adventure stories and young adult fiction. The texts will be situated in their historical and cultural contexts in order to demonstrate how changing ideas of the child and childhood inform both the content and reception of texts aimed at a child or young adult audience. Relevant literary and cultural theory will inform a discussion of adults’ and children’s perceptions of the purposes and value of children’s literature, and an investigation of some of the key themes of children’s literature: gender, race, class, family, education, and sexuality.
