Description of the Course:
This course explores the social, political and cultural issues related to physical and mental health and wellbeing in Australian and International communities. These issues will be explored within the lens of the social origins of health. It will critique the bio-medical origins of health and explore alternative theoretical frameworks, such as social determinants of health, social origins of health, psychosocial and ecological practice models. Particular attention will be given to social determinants of health and how race, ethnicity, sexuality, gender and trauma impact on the wellbeing of communities. It will explore how health policy impacts on different and diverse communities and their impact on health equity and access to services for differently placed individuals and communities.

Grade Scheme: Graded (HD, D, C, etc.)

Supplementary Assessment: Yes

Where supplementary assessment is available a student must have failed overall in the course but gained a final mark of 45 per cent or above and submitted all major assessment tasks.

**Graduate Attributes**

The Federation University FedUni graduate attributes (GA) are entrenched in the Higher Education Graduate Attributes Policy (LT1228). FedUni graduates develop these graduate attributes through their engagement in explicit learning and teaching and assessment tasks that are embedded in all FedUni programs. Graduate attribute attainment typically follows an incremental development process mapped through program progression. **One or more graduate attributes must be evident in the specified learning outcomes and assessment for each FedUni course, and all attributes must be directly assessed in each program.**
