Description of the Course:
This course introduces students to the nature, design and processes of social research. Students will develop an in-depth understanding of research approaches, designs and methods available to social researchers, and will develop critical skills in planning research by integrating methods and practice. The course guides students through the various stages of the research process, from the formulation of a research topic to the development of a research design framework and research proposal. Students will also develop their ability to critically reflect on the ethical and political considerations of social research and to deconstruct the implicit assumptions of social scientific methods.

Grade Scheme: Graded (HD, D, C, etc.)

Graduate Attributes

The Federation University FedUni graduate attributes (GA) are entrenched in the Higher Education Graduate Attributes Policy (LT1228). FedUni graduates develop these graduate attributes through their engagement in
explicit learning and teaching and assessment tasks that are embedded in all FedUni programs. Graduate attribute attainment typically follows an incremental development process mapped through program progression. **One or more graduate attributes must be evident in the specified learning outcomes and assessment for each FedUni course, and all attributes must be directly assessed in each program**
