Description of the Course :

This course enables students to develop an understanding of relevant practice frameworks which inform social work with children and families. Within this course, students will learn to identify, consider and critically reflect on micro-level personal and interpersonal dynamics and macro-level systems factors impacting family wellbeing. Students will develop their capacities to plan interventions aimed at achieving the most effective outcomes for families' health, wellbeing and life chance. Case studies reflecting the complex contemporary challenges confronting children and families will provide the foundation for students to develop and implement social work responses which consider the person in the environment; recognise the lasting impact of oppression and marginalisation on individuals, families and communities; and, uphold the rights, dignity and autonomy of individuals and families.

The Federation University FedUni graduate attributes (GA) are entrenched in the Higher Education Graduate Attributes Policy (LT1228). FedUni graduates develop these graduate attributes through their engagement in explicit learning and teaching and assessment tasks that are embedded in all FedUni programs. Graduate attribute attainment typically follows an incremental development process mapped through program progression. **One or more graduate attributes must be evident in the specified learning outcomes and assessment for each FedUni course, and all attributes must be directly assessed in each program**
